

MINER

MADENCILIK | NAKLIYAT TICARET LTD. ŞTI.

PAINT INDUSTRY

TRUSTWORTHY

It supports the quality of your products by providing a reliable solution in the paint industry. Miner with its superior features Bentonite is available to paint manufacturers.

QUALITY

Miner Take Your Paint Production to the Next Level with Bentonite !

SUPERIOR FEATURES

High Quality: Our products undergo rigorous quality control processes and provide optimum performance in paint production.
Reliability: Provides long-lasting and reliable solutions.
Flexibility: We offer a variety of bentonite products to suit different paint types and applications .
Technical Support: Our experienced team provides technical support and consultancy services throughout the paint production process.

WHY IS IT USED IN THE PAINT INDUSTRY?

- **Viscosity Adjuster :** Bentonite controls the fluidity and consistency of the paint, allowing it to be applied more easily and obtaining a more homogeneous surface.
- **Suspension Agent :** Bentonite helps prevent sedimentation and color differences by ensuring that pigments and fillers are distributed evenly in the paint.
- **Thixtropic Agent :** Bentonite ensures that the paint becomes thinner when shaken and returns to its original consistency when left to stand, allowing it to be mixed more easily and drip less.
- **Water Retention Agent :** Bentonite increases the water retention capacity of the paint, extends the drying time and helps prevent problems such as cracking and swelling .

TECHNICAL SPECIFICATIONS

Analysis Type	Unit	Product Value
Wet Sieve Analysis >53 micron	%	0.06
Moisture Content	%	9-13
Viscosity (min)	m Pass	100
Whiteness (min)	%	70
